ESG and sustainability reporting

Framework Law 99-12 and Corporate Environmental Regulation

A half day to read Framework Law 99-12 on the National Charter for the Environment and Sustainable Development, and to link it to the sector texts that actually apply to your site. Company commitments, waste, air, impact assessments, environmental policing and inspections: you leave with a first list of your site's obligations and the evidence to keep ready.

Duration : 0.5 day

Objectives

1. Explain the purpose of Framework Law 99-12 and the commitments it sets for companies
2. Identify the sector laws that carry the obligations and penalties: environment, impact assessments, air, waste
3. Describe how environmental policing works and how an inspection proceeds
4. Build the first version of your site's register of environmental obligations

Programme

Half day

• Framework Law 99-12: principles, rights and duties, company commitments, State exemplarity and public procurement

• The sector texts: Laws 11-03, 12-03, 13-03 and 28-00, Law 49-17 on environmental assessment and its implementing texts

• Environmental policing: inspection plans, unannounced inspections, findings and follow-up

• National Sustainable Development Strategy and the expectations of customers and lenders

• Exercise: your site's register of obligations and evidence to keep ready; knowledge test

Teaching methods

• Guided reading of the articles of the framework law that concern the company

• Exercise on your authorisations, measurement reports and waste tracking slips

• Simulation of an environmental police inspection

• Delivery possible in Darija for field supervisors

• Final test

Assessment and documents

Knowledge test and follow-up evaluation at D+1, numbered training certificate verifiable online for each participant; the company receives the training report and the first version of its obligations register.

Bilingual materials for every participant; each classroom course comes with its digital twin on OmniLearn.

Good to know

For ongoing regulatory watch, see "Environment and Energy Regulation in Morocco, Monitoring"; for a complete management system, "ISO 14001:2026 — Requirements".

Practical information

Duration	0.5 day
Audience	Management, HSE, environment, legal, CSR
Prerequisites	No prerequisites
Group size	Groups of 6 to 12 participants, in-company
Format	In-company, face to face on your site
Language	French, Darija or English; bilingual materials
Funding	OFPPT special training contracts (TFP), GIAC, Maroc PME: we prepare the applications with you, at no extra cost.
Programme customisation	Programme adapted to your procedures, your equipment and your audience

Frequently asked questions

Does Framework Law 99-12 provide for penalties?
It sets principles and commitments, with no penalties of its own. The obligations that are inspected and penalised come from the sector laws, such as those on waste, air or impact assessments, and from environmental police inspections.

What is the difference from the regulatory watch course?
This half day explains the framework and inspections and starts your register. The day "Environment and Energy Regulation in Morocco, Monitoring" then organises the continuous updating of this register and the assessment of compliance.

Is the register produced useful for ISO 14001?
Yes. ISO 14001:2026 asks you to determine compliance obligations and evaluate compliance with them; the register started in the session is the basis, to be completed with the authorisations specific to your site.
